JCNS Workshop 2015

Neutron Scattering on Nano-Structured Soft Matter: Synthetic- and Bio-Materials“

5 - 8 October, 2015, Tutzing

In the tradition of the annual international JCNS workshops the Jülich Centre for Neutron Science (JCNS) and the Donostia International Physics Center (DIPC) will jointly organize the workshop in 2015.

Neutrons are a key probe providing deep insight into the structure and dynamics and thus in the functioning of synthetic and living soft matter. The workshop will discuss the current status, future trends and opportunities of neutron scattering also in combination with simulations.

The topics addressed are:

- **Functional Polymers**
- **Soft Matter out of Equilibrium**
- **Nano-Composites and Confinement**
- **Nanostructured Complex Fluids**
- **Membranes and Proteins**
- **Soft Matter Materials for Energy Devices**

All topics will be covered by distinguished invited speakers.

In this context oral as well as poster contributions on synthetic as well as on bio-materials are welcome.

The workshop is supported by
